

Tender Enquiry for an automatic film coater (NV/ChE/Jan/01)

Technical and commercial quotations are required for the above item as per the following specifications:

Automatic Film Coater & Micrometer Film Applicator (110 or 220VAC) automatic coater with CE Certified machine designed to produce consistent thick film with a provision for heating cover. It should have an unique driving system to produce smooth coating on all types of materials. One 100 mm width micrometer adjustable applicator (doctor-blade) is included for immediate use. This equipment can be used for research on ceramic tap casting and Li-Ion battery electrode coating. There should be a dis-mountable pushing bar for moving micrometer adjustable applicator

Please submit the technical and commercial quotations separately in sealed envelopes to the undersigned latest by February 6, 2012:
